

RESEARCH AND INNOVATION

Research and innovation plays an essential role in triggering smart and sustainable growth and job creation. By producing new knowledge, research is central to developing new and innovative products, processes and services which enable higher productivity and ultimately prosperity so we focuss on research projects for better growth of students. Innovation in education encourages students and teachers to research, explore and use all the tools to uncover something new. It involves a different way of looking at problems and solving them. It also empowers education because compels students to use a higher level of thinking to solve complex problems. Through research, a person's learning capacity is improved and they can perform better in comparison who is reluctant to research. In so many streams of our Institute Research Projects are continuing through which students learn a lot .
